

Table 2. Learning outcomes of the **Graduate university studies of Early and pre-school education**

SSLO*	DRP1	DRP2	DRP3	DRP4	DRP5	DRP6	DRP7	DRP8	DRP9	DRP10

*SSLO – Set of study learning outcomes

Learning outcomes	Description of the set of study learning outcomes
	Students will be able to:
DRP1	demonstrate a higher level of knowledge and understanding using analysis, synthesis and evaluation skills in the field of theory and practice of early and pre-school education
DRP2	solve problems in new and unknown situations within a broader (or multidisciplinary) context in the professional field of work
DRP3	apply all mother tongue skills in the function of correct speaking and writing development theory and practice
DRP4	use oral and written communication in a foreign language
DRP5	analyse and synthesize interdisciplinary activities in team work with professionals within own and other scientific fields and branches
DRP6	demonstrate the ability to construe research tasks that will be completed by using practical research, by identifying appropriate research working methods as well as by qualitative and quantitative analysis and interpretation of the results
DRP7	demonstrate the ability of designing knowledge, understanding and applying opinions at the level of a review paper following positive achievements of academic discussion and ethical principles
DRP8	apply new strategies in designing an integrated curriculum that will be a response to current knowledge on developmental effects of out-of-family early and pre-school education as an environment tailored for children
DRP9	analyse, evaluate and promote concepts, theories, politics and practice of modern early and pre-school out-of-family education
DRP10	apply modern pedagogical-psychological concepts in observation, evaluation and promotion of knowledge, skills and abilities of each child
